Education

JECRC University, Jaipur

B.Tech – Computer Science & Engineering | CGPA: 9.01/10

Jaipur, Rajasthan, India

2024-2028

Maheswari Public School, Jaipur

Senior Secondary Education | Secondary Education

Professional Summary

Software Developer with experience building full-stack web applications and interactive Power BI dashboards. Worked with React, JavaScript, SQL, Git, and modern frontend tools to develop responsive interfaces and data-driven solutions. Interested in software engineering, artificial intelligence, and data analytics, with a focus on building practical applications that solve real-world problems.

Projects

Portfolio Website ([Github](#)) ([Live](#))

Personal Portfolio Website

- Developed a modern, responsive portfolio to showcase technical projects, skills, and achievements.
- Integrated EmailJS for direct communication and resume download functionality.
- Deployed on Netlify with an optimized, mobile-friendly interface.

Outcome: Created a centralized online portfolio that strengthens professional presence and makes projects, resume and contact information easily accessible to recruiters.

Tech Stack: HTML • CSS • JavaScript • EmailJS • Vercel

Spotify Analysis Dashboard ([GitHub](#))

- Build an interactive Power BI dashboard to analyze Spotify streaming trends.
- Developed DAX measures and dynamic filters for artist, album, and listening insights.
- Designed an intuitive dashboard for efficient data exploration.

Outcome: Enabled quick identification of listening patterns, top-performing artists, and user engagement trends through interactive visualizations.

Tech Stack: Power BI • DAX • Power Query

Blinkit Sales Dashboard ([GitHub](#))

- Built an interactive sales dashboard to monitor revenue, orders, and outlet performance.
- Created KPI cards and dynamic filters for business analysis.
- Performed data transformation using Power Query and DAX.

Outcome: Provided a centralized view of sales performance, enabling faster analysis of business metrics and operational trends.

Tech Stack: Power BI • DAX • Power Query

Loan Analysis Dashboard ([GitHub](#))

- Performed SQL-based analysis of loan application data
- Built Power BI dashboards to visualize customer demographics and loan trends.
- Created KPIs to evaluate approval patterns and lending performance.

Outcome: Simplified the analysis of loan data, helping identify customer trends and key lending insights through interactive reports.

Tech Stack: Power BI • DAX • Power Query

Tech Stack: Power BI • DAX • Power Query

Country Comparison Dashboard ([GitHub](#))

- Designed a Power BI dashboard comparing six countries across education, crime, GDP, poverty, and CO₂ emissions.
- Implemented interactive filters and comparative visualizations.

Outcome: Enabled users to compare multiple socioeconomic indicators in one dashboard, making cross-country analysis faster and more intuitive.

Tech Stack: Power BI • DAX • Power Query

Skills

Languages: Python, C/C++, JavaScript, SQL

Frontend: HTML5, CSS3, React.js

Backend: Node.js, Express.js

CS Fundamentals:

Data Analytics: Power BI, DAX, Power Query

Tools: Git/GitHub, Figma, VS Code, Jupyter Notebook, Salesforce Admin
